Share Buttons for Magento 1 User Guide

Introduction

People like to share things via social networks. With our extension you will give your clients this possibility. Now you can set the Share Buttons connected to all the most popular social networks on any page of your website anywhere. Just choose the place and the style of how the buttons will be displayed. Let the users spread the news about you with their posts - it will give you more popularity.

There is also Share Buttons for Magento 2 in our store.

Magento Compatibility:

Community Edition: 1.8.x, 1.9.x Enterprise Edition: 1.13.x, 1.14.x.1.x

If you experience any issues with the installation, please contact us.

Installation

To install NEKLO extension for Magento 1, you need to have FTP/SSH access details. Attention! It is vital to disable code compilation before installing the extension. If this setting is left enabled, the extension installation can make your site inaccessible.

To disable code compilation, go to your **admin panel > System > Tools > Compilation** and click "Disable"

	This is a demo store. Any o	rders placed thr	ough this s	tore will not l	be honored or fu	lfilled.

How to configure the widget

To set the widget, go to CMS > Widgets > Add New Widget Instance. Set the type [NEKLO] Share Buttons and choose the Design Package/Theme.

After adding the widget, configure it. You will see the Storefront Properties tab:

- 1. Widget Title is the name of this widget
- 2. Assign to the Store Views means the Store Views the widget will be assigned to
- 3. Sort Order is the numerical order of this widget
- 4. Set the **Layout Updates**. Choose the page with **Display On** and particular place with **Block Reference**.

After this go to the **Widget Options** tab. You will see here the following:

- 1. Is Enabled turns the widget on and off
- 2. Icon Type is the style of the buttons. You can choose Circle, Square, and Simple

- 3. Color Icon regulates whether the buttons will be colored or no
- 4. Title Type is the title you can set. It may be the same of the page or you can set the custom title.
- 5. Then you can choose the networks that will appear: Facebook, Twitter, Google+, Pinterest, Reddit, Delicious, StumbleUpon, Digg, and Houzz. For Twitter you should also specify the Hashtag and the Username of the content author. For Delicious you should set the url provider.

NOTE! Houzz will only appear on the PDP page.
