

Advanced Reindexer User Guide

Introduction

All the new changes in your Magento store must be recalculated in order to be shown correctly. To do that Magento has to check all the new data on the move and recalculate it by itself. It is a bad influence on your website. Our Advanced Reindexer extension will release you from this case.

Advanced Reindexer is the extension that allows you reindex the necessary data from your admin panel. Now all the work will be done in a few clicks - our extension adds the button "Update Now" that lets users reindex the information right at the moment.
