

Scroll Up for Magento 1 User Guide

Introduction

Nobody likes scrolling long pages - it takes time and gives nothing in return. Our Scroll Up extension is the best solution for it. It adds a Scroll Up button that returns a user back to the top of the page. It appears when your client goes down the page, so he can jump back anytime.

The extension is preconfigured, so it is ready to use right after installation. You can choose the particular pages, where the button will be displayed, and the color in order to follow the design.

There is also [Scroll Up for Magento 2](#) in our store.

Magento Compatibility:

Community Edition: 1.8.x, 1.9.x

Enterprise Edition: 1.13.x, 1.14.x.1.x

If you experience any issues with the installation, please contact us.

Installation

To install NEKLO extension for Magento 1, you need to have FTP/SSH access details.

Attention! It is vital to disable code compilation before installing the extension. If this setting is left enabled, the extension installation can make your site inaccessible.

To disable code compilation, go to your **admin panel > System > Tools > Compilation** and click "Disable"

This is a demo store. Any orders placed through this store will not be honored or fulfilled.

Cache Storage Management [Flush Magento Cache](#) [Flush Cache Storage](#)

Select All | Unselect All | Select Visible | Unselect Visible | 8 items selected Actions Refresh Submit

Cache Type	Description	Associated Tags	Status
<input checked="" type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
<input checked="" type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input checked="" type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input checked="" type="checkbox"/> Translations	Translation files.	TRANSLATE	ENABLED
<input checked="" type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input checked="" type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	ENABLED
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	ENABLED
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	ENABLED

4. Turn code compilation back on in **System > Tools > Compilation** after the extension was successfully installed.
5. Log out from Magento and login to reload ACL (account control level) rules.

Configuring the extension

To configure the extension, go to **System > Configuration > Neklo > Scroll To Top**. Here you will see the following settings:

1. **Is Enabled** turns the extension on and off.
2. **Color** is the code of the desired color. You can also choose one from the color table above the setting.
3. **Position** sets the position of the button on the page.
4. In the **Display On** tab there is the **All Pages** line. If it is Yes, then the button appears on all pages. If No, then you should specify the pages manually with the appeared lines.

The screenshot shows the Magento Admin Panel interface. At the top, there is a navigation bar with the 'System' tab selected. Below the navigation bar, the 'Scroll To Top' configuration page is displayed. The page is divided into three main sections: General Settings, Frontend Settings, and Display On. The 'General Settings' section includes the 'Is Enabled' dropdown set to 'Yes'. The 'Frontend Settings' section includes a color selection grid, a color input field with the value '#f49c14', and a 'Position' dropdown set to 'Right'. The 'Display On' section includes the 'All Pages' dropdown set to 'Yes'. A 'Save Config' button is located in the top right corner of the configuration area. On the left side, there is a sidebar with a 'Configuration' menu and a 'Current Configuration Scope' dropdown set to 'Default Config'.
