# NEKLO

## Installation

### Manual Installation

1. Unpack the zip file provided into the root folder of your Magento installation.
2. Go to **Magento Admin Panel** and flush cache under **System → Cache Management** menu.

# NEKLO

## Configuration

To configure extension open your **Magento Admin Panel** and go to:

**System → Configuration → Neklo → Twitter Timeline**

Here you could turn extension on or off:

The screenshot shows the Magento Admin Panel configuration interface. At the top, there are tabs for 'CMS' and 'System'. Below the tabs, there is a 'Current Configuration Scope' dropdown menu set to 'Default Config'. A sidebar on the left shows a 'Configuration' menu with 'NEKLO' selected, and sub-items for 'Twitter Timeline' and 'Extensions & Contact'. The main content area is titled 'Twitter Timeline' and contains a 'General Settings' section. In this section, the 'Is Enabled' dropdown is set to 'Yes', and there is a '[STORE VIEW]' link. Below the settings, a red text prompt reads 'Enable widget for your website'.

### Widget setup

To setup the widget please go to:

**CMS → Widgets → Add New Widget Instance**

Select **[Neklo] Twitter Timeline** as **Type** and currently used **Design Package/Theme**.

The screenshot shows the 'Add New Widget Instance' page in the Magento Admin Panel. At the top, there are tabs for 'CMS' and 'System'. The page is divided into two main sections: 'Widget Instance' on the left and 'New Widget Instance' on the right. The 'New Widget Instance' section has a 'Settings' form with two dropdown menus: 'Type \*' set to '[NEKLO] Twitter Timeline' and 'Design Package/Theme \*' set to 'rwd / default'. Below the dropdowns is an orange 'Continue' button with a checkmark icon.

And widget options:

The screenshot shows the Magento CMS System interface for configuring a widget. The top navigation bar includes 'CMS' and 'System' tabs, and a 'Get help for this page' link. The main content area is titled 'Widget "Twitter Widget"' and features a toolbar with 'Back', 'Reset', 'Delete', 'Save', and 'Save and Continue Edit' buttons. On the left, a sidebar shows 'Widget Instance' with sub-sections for 'Frontend Properties' and 'Widget Options'. The main area displays the 'Widget Options' configuration, including a dropdown for 'Is Enabled' set to 'Yes' and a text area for 'Widget HTML' containing the following code:

```
<a class="twitter-timeline" href="https://twitter.com/magento" data-widget-id="675664569721843713">Tweets by @magento</a>
<script>function(d,s,id){var js,fjs=d.getElementsByTagName(s)[0],p=/^http/.test(d.location)?http:'https':if(!d.getElementById(id))fjs=d.createElement(s);js.id=id;js.src=p+'//platform.twitter.com/widgets.js';fjs.parentNode.insertBefore(js,fjs);}(document,"script","twitter-wjs");</script>
```

Below the text area is a link: '▲ Create a new timeline widget [here](#)'.
