

Visual Product Sorting by Drag and Drop User Guide

Introduction

Visual Product Sorting is an extension for your Magento store that makes editing product representation easy and visually seen. This widget displays products in your Magento admin panel in the way customers see them in your store and you can easily change the product's position using drag and drop.

This extension helps you regulate which products your customers will see and where. There are additional options that allow you to hide disabled and out-of-stock products so that there will be only relevant information in your store.

Magento Compatibility

Community Edition: 2.4.x

Manual Installation

1. Unpack the zip file provided into the root folder of your Magento 2 installation.
2. From a command line run:
 - bin/magento module:enable Neklo_Core;
 - bin/magento module:enable Neklo_ProductPosition;
 - bin/magento setup:upgrade;
 - bin/magento setup:static-content:deploy.

If you experience any issues with the installation, please [contact us](#).

Configuring the Extension

To configure the extension, log into your **Admin Panel** and go to **Stores > Settings > Configuration > Neklo > Product Position**.

General and Grid Settings

The screenshot shows the 'Configuration' page for the Neklo extension. On the left is a sidebar with navigation links: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, and SYSTEM. The main area is titled 'Configuration' and includes a 'Scope: Default Config' dropdown and a 'Save Config' button. The settings are divided into two sections: 'General' and 'Grid Settings'. In the 'General' section, there is a setting '1 Is Enabled [global]' with a dropdown menu set to 'Yes'. In the 'Grid Settings' section, there are three settings: '2 Load More Button [global]' with a dropdown set to 'No' (with a note: 'Select "Yes" value to display "Load More" button. Select "No" value to display page pagination'), '3 Row Count [global]' with a text input set to '3', and '4 Column Count [global]' with a text input set to '4'.

1. **Is Enabled** turns the extension on and off.

Important Note: after you enable the extension you should go to each category your store has and re-save it. It should be done to sort the products with the same position. Now you can start setting up the positions of your products.

2. **Load More Button** allows you to display the Load More button on the Neklo Visual Product Position tab. Select "No" value to display page pagination.

3. **Row Count** defines the quantity of displayed rows in the product grid on the Neklo Visual Product Position tab.

4. **Column Count** defines the quantity of displayed columns in the product grid on the Neklo Visual Product Position tab.

Important Note: Out of Stock products won't be displayed in the Product Position tab if the option **Display Out of Stock Products in System > Configuration > Catalog > Inventory > Stock Options > Display Out of Stock Products** is set up to No.

Cache Management Tab

Go to **System > Tools > Cache Management**.

5. Please click **Flash Magento Cache** to flush caches and changes. It will at once be applied to your store on the front page.

Product Position Tab

Go to **Catalog > Categories > Specific Category > Product Position tab**. Please remember that you need to select any specific category to see the extension tab.

The screenshot shows the 'Jackets (ID: 23)' page in the Neklo system. The left sidebar contains navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area has a 'Scope: All Store Views' dropdown and 'Delete' and 'Save' buttons. Below this are 'Add Root Category' and 'Add Subcategory' buttons. A category tree on the left shows 'Jackets (ID: 23) (186)' selected. To the right, there are toggle switches for 'Enable Category' and 'Include in Menu', both set to 'Yes'. A 'Category Name' field contains 'Jackets'. Below these are expandable sections: 'Content', 'Display Settings', 'Search Engine Optimization', 'Products in Category', 'NEKLO Visual Product Position' (marked with a red circle and '1'), 'Design', and 'Schedule Design Update'.

1. Choose Neklo Visual Product Position.

The screenshot shows the 'NEKLO Visual Product Position' tab. It displays a grid of eight jackets, each with a product image, name, SKU, price, and stock status.

 Olivia 1/4 Zip Light Jacket SKU: WJ12 \$77.00 In Stock	 Juno Jacket SKU: WJ06 \$77.00 In Stock	 Neve Studio Dance Jacket SKU: WJ11 \$69.00 In Stock	 Nadia Elements Shell SKU: WJ10 \$69.00 In Stock
 Jade Yoga Jacket SKU: WJ09 \$32.00 In Stock	 Adrienne Trek Jacket SKU: WJ08 \$57.00 In Stock	 Inez Full Zip Jacket SKU: WJ07 \$59.00 In Stock	 Riona Full Zip Jacket SKU: WJ05 \$60.00 In Stock

Neklo Visual Product Position tab has a grid view with products which are assigned to your specific category and displayed according to extension settings. Please remember the quantity of products per page on front is managed at **System > Configuration > Catalog > Catalog section** and isn't connected with extension settings. Separate product item reflects product **Name, SKU, Prices, and Availability in Stock**.

Displaying of **Page Pagination** and **Load More** button for Product grid on Neklo Visual Product Position.

You can **pin a product with the Pin button** on the upper right corner of the image. After that the Pinned product won't be moved by any means. If it has been disabled, then its place will be taken by the first non-pinned product. Other pinned products will retain their positions. When the product is enabled again, it will use its initial position and move the non-pinned products forward.

Switch with next

You can also move products using **Arrows** on the lower part of the product image. Both arrows will move your product one step. Pinned products will remain in their places, so the product you are moving will just jump over it.

Move to page number

Double arrows will move your product to the beginning and to the end of the page. Pinned products will remain on their positions, so the product you are moving will appear only after the Pinned products if they are on the first positions and before them if they are on the last positions.

Products are possible to move using the **Drag & Drop** system. Just click on the product and hold. Then drag it into any place you want and release the button.

After you have set all the options, don't forget to save the category. Right after that you can check the front end and see all the changes.

Adding or Importing a Product

When you're adding or importing a new product, it will appear at the head of the first page after the Pinned products (if there's pinned product on the specific category page). Don't forget to run reindexes after product import.

Thank you for installing and using the extension. More of our great solutions for Magento can be found here: store.neklo.com
